Barristro Café/Patio Style Bike Parking

Barristro Bike Racks

In the fall of 2012 SiteScapes proposed a design competition to the University of Nebraska's Architecture department and the student chapter of AIA. The Barristro collection is the fruit of that collaboration.

Designed by Justin Brouillette, the Barristro collection was proposed as a small family of like minded urban furnishings with an array of uses and users in mind. The collection's fluid geometry allows for modular pieces to interact in interesting and unique ways.

Barristro bike posts are surface mounted and can be positioned in any small space. Locks and cables can be threaded through the interior sleeve and provide bike security while providing an interesting aesthetic to your project.

Materials

- Bike Post - 1/4" Steel plate
- Interior Tubes - 2" x 2" square tube
- Foot plates - 1/4" stainless steel

Sustainability and LEED

Barristro bike posts have a recycled material content of 99% of which 87% is post consumer content. This content may vary based on the product design, product material type, and interchangeable piece parts. All styles are 100% recyclable. For more information about SiteScapes sustainable products and policies, please refer to our Environmental Statement.

Choices

Choose embedded or surface mount; powdercoat, Duracoat, or galvanized.

Finishes

SiteScapes offers product in both a standard powdercoat and its own proprietary Duracoat finish. Both finishes are designed to weather the elements and are guaranteed not to rust, chip, peel, or fade. Call for a standard color chart.
